

## ————Basic Methods————

**imrn** -> import { \$1 } from 'react-native';

**imrc** -> import React, { Component } from 'react';

**\*\*imp** -> import moduleName from 'module';

**\*\*lmd** -> import { destructuredModule } from 'module';

**ime** -> import \* as alias from 'module';

**exp** -> export default moduleName

**\*\*enf** -> export const functionName = (params) => { };

**\*\*dob** -> const {propName} = objectToDescruct

**ren** -> render() { return( ) };

**\*\*rnss** ->

const styles = StyleSheet.create({

})

## ————Redux————

**redux** import { connect } from 'react-redux';

**\*\*rxaction** -> redux action template

**\*\*rxconst** -> export const \$1 = '\$1';

**\*\*rxreducer** -> redux reducer template

**reduxmap** ->

const mapStateToProps = (state) => ({

})

const mapDispatchToProps = {

}

## ————Console————

**\*\*clg** -> console.log(object)

## ————React Components————

**\*\* rfe ->**

```
import React from 'react'
```

```
const $1 = (props) => {  
  return (  
    <div>  
      $0  
    </div>  
  )  
}
```

```
export default $1
```

## ————React Native Components————

**rnc ->**

```
import React, { Component } from 'react'
```

```
import { Text, View } from 'react-native'
```

```
export default class $1 extends Component {  
  render() {  
    return (  
      <View>  
        <Text> $2 </Text>  
      </View>  
    )  
  }  
}
```

**\*\* rnce ->**

```
import React, { Component } from 'react'
```

```
import { Text, View } from 'react-native'
```

```
class $1 extends Component {  
  render() {  
    return (  
      <View>
```

```
      <Text> $2 </Text>
    </View>
  )
}
```

```
export default $1
```
